

Public Health is Personal.

Public health professionals focus on preventing disease and injury by promoting healthy lifestyles.

Its Reach is Global.

The public health field confronts global health issues, such as improving access to health care, controlling infectious disease, and reducing environmental hazards, violence, substance abuse, and injury.

The Impact is Measurable.

In the past century, public health initiatives have improved lives worldwide, including increasing life expectancy by almost 30 years in the United States.

What does the Service Cost?

We accept Medicare, Medicaid, and insurance. If not eligible for third party payment, a sliding fee scale is available based on income and medical expense. We also receive grant funding, including Elderbridge Agency on Aging.
